

FEBRUARY 2025 COMMISSIONED FRAMEWORK PLACEMENTS QSO UPDATE (APPENDIX 1)

Adult Mental Health / Learning Disabilities

PURPOSE

"The possession of accurate, relevant and useable information from which the safety and quality of services can be ascertained is the vital key to effective commissioning"

(Public Health Wales (2014) Achieving Prudent Healthcare in NHS Wales).

The primary role of the NHS Wales Quality Assurance and Improvement Service is to provide assurance to Local Commissioners that their patients, placed under the NHS Wales National Collaborative Frameworks who are receiving safe, effective care with, whenever possible, an improved experience.

BACKGROUND

As part of the National Frameworks the NHS Wales Quality Assurance and Improvement Service has developed a process to monitor and analyse comprehensive patient level information and to present that information, on a regular basis, to health and social care commissioners.

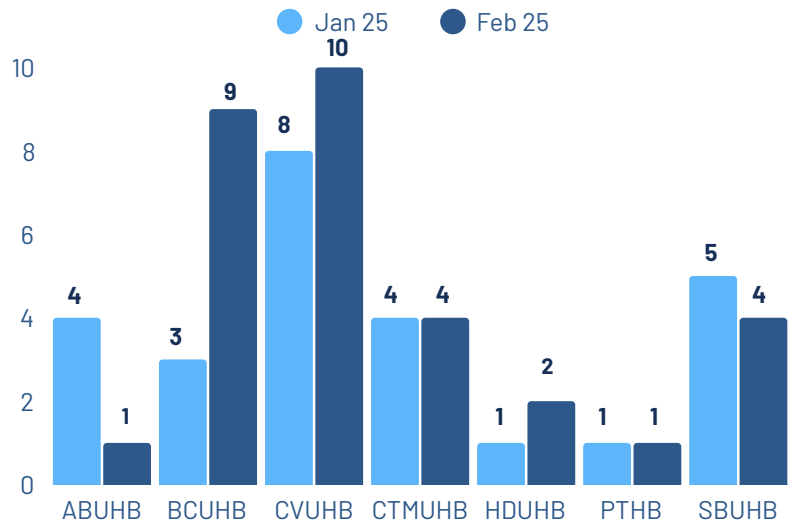

Commissioners, care co-ordinators and case managers will now be more informed and can, if necessary, take appropriate action based on the information supplied through the assurance statements.

METHODOLOGY

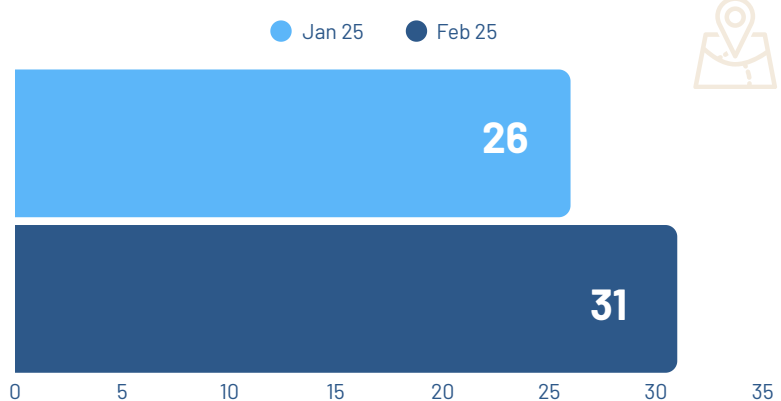

The data presented in the commissioner assurance statement is for those patients cared for under the auspices of the NHS National Collaborative Frameworks.

The data is gathered under the contractual obligations of the Frameworks directly from providers and collated and analysed by the NHS Wales Quality Assurance and Improvement Service.
